

## Special Note!

The white roller-ball cups included with your MC-600 are a bonus from the manufacturer. Due to sterilization and sanitation issues, we recommend that these be for personal use or for a single client. To properly clean and sanitize, the unit must be completely disassembled and is not built for that repeat procedure.

The DVD instruction features the use of these cups, due to them being included with the MC-600 machine. As a bonus from the manufacturer, the small, medium and large roller cups are not covered under any warranties (expressed or implied).
